

@alvarosaburido1

```
<select
  :id="formControl.id"
  v-model="formControl.value"
  :name="formControl.name"
  class="form-control"
>
  <option
    v-for="opt in formControl.options"
    :key="opt.text"
    :value="opt.value"
    :disabled="opt.disabled"
  >
    {{ opt.text }}
  </option>
</select>
```

`<input-select />`

Props

Events

{  }

`<input-select />`

Props

- Control

Events

- @change
- @blur
- @focus

```
<select
  :id="formControl.id"
  v-model="formControl.value"
  :name="formControl.name"
  class="form-control"
>
  <option
    v-for="opt in formControl.options"
    :key="opt.text"
    :value="opt.value"
    :disabled="opt.disabled"
  >
    {{ opt.text }}
  </option>
</select>
```

Wait... how do I submit the **form**
if there is no button?
